External Customer Report
Generated March 24, 2026

92 Ext. Customers	117 Ext. Users	496 Total Prompts	4 Regions
75.0% Success Rate	372 Successful	62 Cannot Help	62 Errors

Status Classification Methodology

Each interaction is classified into one of three status categories:

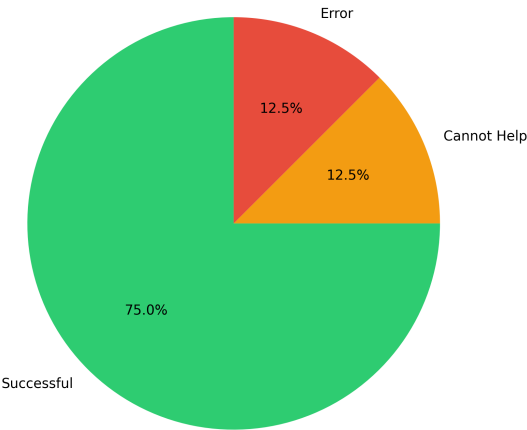

Status	Definition	Examples
Successful	Agent provided a helpful response with meaningful content.	• Brand guidelines provided • Assets listed • Rules displayed
Cannot Help	Agent cannot handle request due to missing skills or configuration.	• "Skill not found" • "Unable to determine" • "Config not available"
Error	Infrastructure or system error prevented response delivery.	• Router errors • Empty response • Connection failures

Detection Logic:

- 1. Check for empty response → Error
- 2. Check system trace for exceptions → Error
- 3. Check response for error patterns (router error, json-rpc error) → Error
- 4. Check response for inability patterns (skill not found, cannot help) → Cannot Help
- 5. Otherwise if has content → Successful

Response Status & User Intent

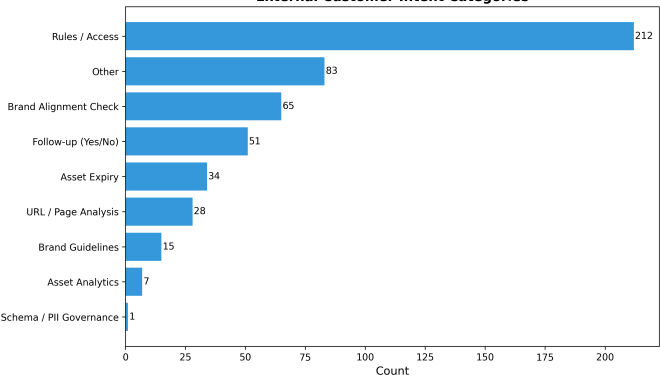

External Customer Response Status

Response Breakdown:

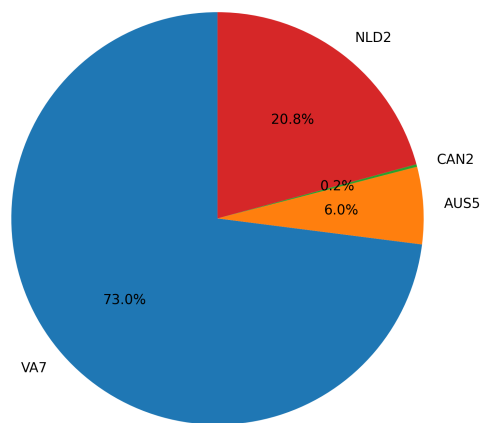

- **Successful:** 372 (75.0%)
- **Cannot Help:** 62 (12.5%)
- **Error:** 62 (12.5%)

Mar 04 12:38	Show rules in contenthub	*_No ABAC rules are configured in Content Hub for this environment_* To get started, you can create rules that grant access to specific groups based on asset metadata. Use the tables below to see available groups and metadata properties you can filter on.	Successful
Mar 04 21:09	How do i set access rules?	You can't configure rules for this ContentHub environment. Choose a different environment or contact your administrator.You can't configure rules for this ContentHub environment. Choose a different environment or contact your administrator.	Successful
Mar 05 13:12	Show all existing Content Hub ABAC rules.	No matching rules were found for the requested filters.	Successful
Mar 05 13:13	Create a new rule in Content Hub	Which group should this rule apply to, and what metadata conditions (if any) should restrict access? Please specify the group and any asset filters. You can reply "show available groups" to see the available groups for this environment.	Successful
Mar 05 13:14	Show available groups and metadata properties to set rules i	(empty response)	Error
Mar 05 13:15	how available groups and metadata properties to set rules in	(empty response)	Error
Mar 05 14:01	Show all existing Content Hub ABAC rules.	No matching rules were found for the requested filters.	Successful
Mar 11 14:37	What is ABAC in Content Hub and what can you help me do?	Attribute-Based Access Control (ABAC) in Content Hub is a method that allows administrators to define metadata-based rules to control access to digital assets. These rules determine which assets are visible to specific user groups based on the metadata associated with the assets. This approach provides a more granular and dynamic way to manage asset visibility compared to traditional folder-based permissions. Here's what ABAC enables you to do: 1. **Define Metadata-Based Rules** : Administrator...	Successful

Mar 18 16:41	Approve	The approved access rule changes have been applied. Assets for the group "AEM Assets Limited Users - delivery - POP - Prod" will now be shown where the client is not Sanofi and the brand is neither DUPIXENT nor AMLITELIMAB. These rules are now configured for Content Hub.	Successful
Mar 18 16:43	I would like to edit the access rule for this group AEM Asse	To confirm, you want the rule to show all assets EXCEPT those where client is Sanofi AND (brand is DUPIXENT OR brand is AMLITELIMAB). Is that correct? This means assets will be visible unless both the client is Sanofi and the brand is either DUPIXENT or AMLITELIMAB. Please confirm if this is the intended logic.	Successful

Time (UTC)	User Prompt	Response	Status
Mar 18 16:44	Approve	The approved access rule changes have been applied. All assets will now be visible to the group "AEM Assets Limited Users - delivery - POP - Prod" except those where the client is Sanofi and the brand is either DUPIXENT or AMLITELIMAB. These rules are now configured for Content Hub.	Successful
Mar 18 16:49	I would like to edit the rule for this group AEM Assets Limi	To confirm, you want the rule to show assets ONLY if the client is NOT Sanofi AND the brand is NOT DUPIXENT AND the brand is NOT AMLITELIMAB. This means an asset will be hidden if it matches ANY of these: client is Sanofi, brand is DUPIXENT, or brand is AMLITELIMAB. Is this the intended logic? Please confirm.	Successful
Mar 18 16:50	Approve	The approved access rule changes have been applied. Assets from client Sanofi, brand DUPIXENT, or brand AMLITELIMAB will no longer be available to view for the group "AEM Assets Limited Users - delivery - POP - Prod." These rules are now configured for Content Hub.	Successful
Mar 18 16:52	I would like to edit the rule for this group AEM Assets Limi	To confirm, you want the rule to show assets ONLY if the client is NOT Sanofi AND the brand is NOT DUPIXENT AND the brand is NOT AMLITELIMAB. This means an asset will be hidden if it matches ANY of these: client is Sanofi, brand is DUPIXENT, or brand is AMLITELIMAB. Is this the intended logic? Please confirm.	Successful
Mar 18 16:53	Cancel	The rule change request has been canceled. No changes have been made to the access rules for the group "AEM Assets Limited Users - delivery - POP - Prod." If you need further assistance or want to make a different update, please let me know!	Successful
Mar 18 16:54	I would like to edit the rule for this group AEM Assets Limi	You requested to update the rule for the group "AEM Assets Limited Users - delivery - POP - Prod" to: (popMasterClient NOT_EQUALS Sanofi OR popBrand NOT_EQUALS DUPIXENT OR popBrand NOT_EQUALS AMLITELIMAB) Please confirm if you would like to proceed with this rule change, or let me know if you want to make any adjustments.	Successful
Mar 18 16:55	Approve	The approved access rule changes have been applied. The group "AEM Assets Limited Users - delivery - POP - Prod" will now have access to assets if any of the following are true: the client is not Sanofi, the brand is not DUPIXENT, or the brand is not AMLITELIMAB. These rules are now configured for Content Hub.	Successful
Mar 18 16:57	I would like to edit the access rule for this group AEM Asse	You requested to update the rule for the group "AEM Assets Limited Users - delivery - POP - Prod" to: (popMasterClient EQUALS Sanofi AND (popBrand NOT_EQUALS DUPIXENT OR popBrand NOT_EQUALS AMLITELIMAB)) Please confirm if you would like to proceed with this rule change, or let me know if you want to make any adjustments.	Successful

Time (UTC)	User Prompt	Response	Status
Mar 18 16:57	Approve	The approved access rule changes have been applied. The group "AEM Assets Limited Users - delivery - POP - Prod" will now have access to assets where the client is Sanofi and the brand is not DUPIXENT or not AMLITELIMAB. These rules are now configured for Content Hub.	Successful
Mar 18 17:00	I would like to edit rule for this group AEM Assets Limited	You requested to update the rule for the group "AEM Assets Limited Users - delivery - POP - Prod" to have no restrictions (full access to all assets). Please confirm if you would like to proceed with this rule change, or let me know if you want to make any adjustments.	Successful
Mar 18 17:00	Approve	The approved access rule changes have been applied. The group "AEM Assets Limited Users - delivery - POP - Prod" now has no restrictions and can view all assets in Content Hub.	Successful
Mar 18 17:03	I would like to edit the access rule for this group AEM Asse	To confirm, you want the rule to show assets ONLY if the client is NOT Sanofi AND the brand is NOT AMLITELIMAB AND the brand is NOT DUPIXENT. This means an asset will be hidden if it matches ANY of these: client is Sanofi, brand is AMLITELIMAB, or brand is DUPIXENT. Is this the intended logic? Please confirm.	Successful
Mar 18 17:04	not quite, we need assets not showing for either brand - DUP	To confirm, you want the rule to hide assets for client Sanofi when the brand is either DUPIXENT or AMLITELIMAB. In other words, assets will only be visible if the client is not Sanofi, or if the client is Sanofi and the brand is not DUPIXENT or not AMLITELIMAB. Is this the intended logic? Please confirm before applying the rule change.	Successful
Mar 18 17:05	Approve	The approved access rule changes have been applied. Assets for client Sanofi with brand DUPIXENT or AMLITELIMAB will no longer be visible to users in the group "AEM Assets Limited Users - delivery - POP - Prod." These rules are now configured for Content Hub.	Successful
Mar 18 17:08	I would like to edit the access rule for this group AEM Asse	To confirm, you want the rule to show assets ONLY if the client is NOT Sanofi AND the brand is NOT DUPIXENT AND the brand is NOT AMLITELIMAB. This means an asset will be visible only if all three conditions are met. Is this the intended logic? Please confirm.	Successful
Mar 18 17:09	Approve	The approved access rule changes have been applied. The group "AEM Assets Limited Users - delivery - POP - Prod" will now only see assets where the client is not Sanofi and the brand is neither DUPIXENT nor AMLITELIMAB. These rules are now configured for Content Hub.	Successful

Mar 16 13:59	is this page on brand: https://wknd.site	You've already asked if https://wknd.site follows brand guidelines. Here's a summary of the main findings from the previous evaluation: - The page strongly reflects Wknd Site's adventurous and explorative spirit. - However, it does not fully comply with all brand guidelines. Key issues include missing the official tagline, a lack of required signature phrases, emphasis on mainstream destinations, insufficient practical advice, and not using brand-specific colors or design elements in images. - ...	Successful
Mar 16 14:00	is this page on brand: https://wknd.site	You've already asked about https://wknd.site and received a detailed assessment. That page demonstrates the Wknd Site brand's adventurous tone but is missing several key brand requirements, such as the official tagline, signature phrases, and brand-specific visual elements. The overall recommendation is that it needs enhancements to fully meet all guidelines.	Successful
Mar 16 14:01	is this page on brand: https://wknd.site	The compliance of https://wknd.site with Wknd Site brand guidelines was already evaluated. In summary: while the site captures the brand's adventurous spirit, it does not fully align with all requirements—most notably missing the official tagline, lacking signature phrases, and not using required brand visual elements. Some improvements would be needed for full compliance.	Successful
Mar 16 14:03	is this page on brand: https://wknd.site	This page (https://wknd.site) has already been reviewed. While it captures the brand's adventurous tone, it does not fully comply with all Wknd Site brand guidelines. Main issues include the absence of the official tagline, missing signature phrases, focus on mainstream destinations, lack of vivid, practical advice, and images that don't use primary brand colors or official design elements. Enhancements in these areas are needed for complete alignment.	Successful
Mar 16 14:22	is this page on brand: https://www.wknd.site	Here's a brand policy analysis for Wknd Site page (https://www.wknd.site). This report reviews text and image content for brand standards and alignment.	Successful
Mar 16 14:23	is this page on brand: https://wknd.site	You've already asked about https://wknd.site and received evaluation results. The page demonstrates the Wknd Site brand's adventurous and inspiring themes, but is missing the official tagline, required signature phrases, practical tips, and consistent use of brand colors in images. For full compliance, those elements would need to be addressed.	Successful
Mar 19 10:39	check if this page is on brand : https://wknd.site	Here's a brand policy analysis for Wknd Site page (https://wknd.site). This report evaluates alignment with Wknd Site's brand voice, use of official taglines and phrases, image standards, and overall adherence to brand guidelines.	Successful

Customer: Trane Technologies

6 prompts | 1 user(s) | Success: 6 | Cannot Help: 0 | Error: 0

Time (UTC)	User Prompt	Response	Status
Mar 20 14:48	Check this page for brand accuracy https://www.trane.com/com	The provided URL is not allowed for evaluation. No matching active domain has been configured for this URL. To add it or to ensure that it is active, go to the [Domains tab](https://experience.adobe.com/#!/@ingersollrand/experiencemanager/security/governance-context/domains).	Successful
Mar 20 14:49	I've updated the domain, try again	Here's a comprehensive evaluation of https://www.trane.com/commercial/north-america/us/en.html against Trane Commercial brand guidelines. This report covers text content, imagery, and alignment with brand standards.	Successful
Mar 20 14:55	is there a way to export this information?	There isn't an export feature available directly within this platform. However, you can manually copy the evaluation results provided here or use your browser's functionality to print or save the page as a PDF for your records.	Successful
Mar 20 15:12	Check this page: https://www.trane.com/residential/	Here's a compliance review of https://www.trane.com/residential/ against Trane Commercial brand guidelines, covering both text and image content.	Successful
Mar 20 15:15	check this page: https://fliphtml5.com/site/70302826/index.h	Here's a brand guidelines evaluation for https://fliphtml5.com/site/70302826/index.html based on Trane Commercial standards. This review focuses on text content, as images were not analyzed.	Successful
Mar 20 15:16	can you give a more concise summary?	The evaluation of https://fliphtml5.com/site/70302826/index.html against Trane Commercial brand guidelines found the text aligns well with mission, tone, and audience targeting. However, the content has areas for improvement: it uses some jargon and longer sentences that affect clarity, and it lacks authentic customer stories or detailed case studies. Visual design and imagery guidelines could not be assessed due to the absence of images on the page.	Successful

Mar 04 19:36	How do i set access rules?	Attribute-Based Access Control (ABAC) rules in Content Hub let you control which user groups can access specific assets based on metadata properties (like business line, format, campaign, etc.). Here, you can view, create, update, or delete these rules for Content Hub only. I can help you manage these rules—just tell me which group(s) and metadata conditions you want to set access for. Note: This does not configure permissions for AEM Assets or other systems.	Successful

Governance Agent

Daily Update
Generated March 24, 2026

7 Ext. Customers	7 Ext. Users	24 Total Prompts	2 Regions
95.8% Success Rate	23 Successful	1 Cannot Help	0 Errors

Status Classification Methodology

Each interaction is classified into one of three status categories:

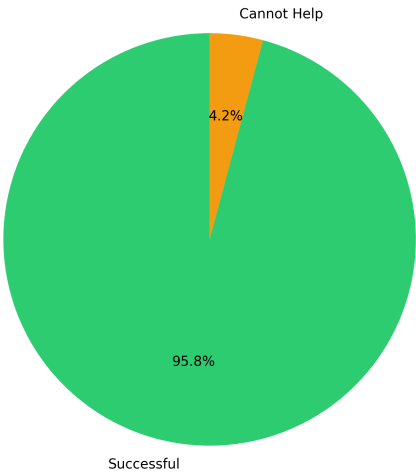

Status	Definition	Examples
Successful	Agent provided a helpful response with meaningful content.	• Brand guidelines provided • Assets listed • Rules displayed
Cannot Help	Agent cannot handle request due to missing skills or configuration.	• "Skill not found" • "Unable to determine" • "Config not available"
Error	Infrastructure or system error prevented response delivery.	• Router errors • Empty response • Connection failures

Detection Logic:

- 1. Check for empty response → Error
- 2. Check system trace for exceptions → Error
- 3. Check response for error patterns (router error, json-rpc error) → Error
- 4. Check response for inability patterns (skill not found, cannot help) → Cannot Help
- 5. Otherwise if has content → Successful
