STRONG SIGNALS

- Ford: 42% SR across 19 interactions with 7 unique users — broadest external team engagement
- HDI AG, Microsoft Careers, WOOLWORTHS LTD: 100% SR
- 92 external organisations active — sustained breadth of reach
- 140 new users onboarded this week

WATCH

- External SR plunged to 9.0% — lowest since W03 (was 24.3% last week)
- Total interactions down 20.6% WoW (827 vs 1,042)
- First State Super: 33 interactions, 0% SR (form-creation dominant)
- Bounteous dropped from 84% SR in W11 to 0% SR this week

ACTION NEEDED

- form-creation intent driving 0% SR in multiple orgs — feature gap or missing configuration
- information-request failures across 8+ orgs suggest out-of-scope usage patterns
- Bounteous regression (84%→0%) needs urgent investigation

Standout performers: HDI AG (100% SR), Microsoft Careers (100%), and WOOLWORTHS LTD (100%) demonstrate that the agent can succeed when properly configured. Ford led volume-with-quality at 42% SR across 7 users — the only multi-user org with meaningful success. **Top concerns:** First State Super drove 33 interactions at 0% SR via form-creation requests, suggesting an entirely unsupported intent. Bounteous — last week's strongest performer at 84% SR — posted 0% this week across 20 form-creation interactions, indicating a potential regression or new use case mismatch. 20 spotlight orgs with 3+ interactions recorded zero successes this week.

The agent has processed **8,205 interactions** across **286 organisations** since WO2 2026. External volume continues to grow — 219 unique external organisations have engaged with the agent. Overall SR is 43.4%, with a persistent gap between internal (48.6%) and external (20.4%). W12 marks a notable external SR regression to 9.0%, driven by a surge in form-creation and information-request intents that fall outside the agent's current capabilities.

KEY OBSERVATIONS

The external failure rate hit a new high of 91% in W12 — every 9 out of 10 external tagged interactions failed. Plain *failure* dominates at 38.1% of all tagged interactions, while *incomplete* at 16.8% points to abandoned or timed-out sessions. The W12 spike appears driven by a surge in form-creation and information-request intents that fall entirely outside the agent's supported operations. Florida Power & Light (68 failures) and Air India (64) remain chronic external failure sources and require dedicated onboarding. Bounteous has now entered the top-5 failure list after its sharp W12 regression.

Insights & Plan Forward

Analysis and recommended actions

WHAT IMPROVED

External organisation breadth reached 219 unique orgs all-time, with 92 active in W12 alone. New user acquisition remains strong at 140 this week. Ford demonstrated that multi-user external teams can succeed with content-introspection at meaningful scale. HDI AG, Microsoft Careers, and WOOLWORTHS LTD showed the agent can achieve 100% SR when intents are within scope and configuration is correct.

WHAT NEEDS ATTENTION

External SR collapsed to 9.0% this week — the sharpest single-week decline in the dataset. The external failure rate is now 91%, up from 76% in W11. The form-creation intent is driving high-volume 0% SR across First State Super, Bounteous, Expedia, and HDI AG (except HDI succeeded). Content-update external SR dropped to 6.6% from 35.7% in W11 — a 29-point regression in one week.

RECOMMENDED NEXT STEPS

1. Investigate the form-creation intent surge — determine if this reflects a new customer expectation or a marketing/demo script driving unrealistic use cases.
2. Urgently triage Bounteous: identify what changed between W11 (84% SR) and W12 (0% SR).
3. Suppress or redirect information-request and form-creation intents with clearer out-of-scope messaging to reduce noise in SR metrics.
4. Target Florida Power & Light and Air India for direct onboarding — combined 132 failures all-time.
